## CAREER OBJECTIVE

---

Flexibly learn and master new technologies. Consistently engage to further advance my knowledge and experience within software engineering, cloud architecture, and project management.

## EXPERIENCE

---

### University of Buea

*Software Engineer(student)*

**Buea, Cameroon**

July 2021

As part of my research paper “Analysis and Design of Network-based Stock price Systems”

- I scrapped stock data from yahoo finance using the company ticker symbol
- I divided this data into training and testing datasets then implemented the long short-term memory machine learning model design with Python
- Made predictions on the test data and produced and graphical presentation of the test and train results [\[Link\]](#)

### United Nations ESCWA Technology Center

*Web Developer (intern)*

**Remote**

November 2020 - February 2021

- In a long-term effort to support youths and small start-ups in the middle eastern regions, the UN had the development team contribute to some web applications which would serve to provide free tools to youths and a community for small enterprises to share and request resources.
- My role in this was to convert designs from the UI design team into working responsive web applications using HTML, CSS, and Drupal.
- Debugging web applications built by previous interns, and updating design content
- Meetings with technical and non-technical teams to discuss the web application status, project deadlines, and iterations.

### University of Buea

*Mobile Developer(student)*

**Buea, Cameroon**

May 2020 - July 2020

- Worked with my class team to build an application that monitors and tracks the distribution of amenities to the population during the COVID-19 pandemic
- I designed and implemented the user registration and user update interface from scratch with Java and Kotlin
- Wrote the code to make this process functional. [\[link\]](#)

## EDUCATION

---

### The University of Buea

*Bachelor of Science in Computer Engineering*

**Buea, Cameroon**

September 2017 to Present

Analysis and Design of Network-Based Stock Price systems – Dr. Elie FUTE

**Relevant Coursework:** Introduction to Programming, Object-Oriented Programming, Algorithms, and Data Structures, Software Development Life cycle, Cloud computing, and Cloud service Oriented Architectures.

## RELEVANT SKILLS & INTERESTS

---

### Technical:

- Javascript
- HTML & CSS
- ReactJs
- Git & Github
- Python
- Machine Learning
- Java
- kotlin
- MySQL

### Soft:

- Strong Communication
- Dedication
- Team player
- problem-solving

### Interests:

- Cloud Architecture
- Movie Adaptations of Mythological books
- Developer Advocacy

## PROJECTS

---

### Markdown Previewer

A Reactjs application that takes in markdown input, converts, and previews the corresponding HTML output live. Markdown is a lightweight markup language for creating formatted text using a plain-text editor.

## PROFESSIONAL CERTIFICATIONS & TRAINING

---

### **Responsive Web Design**

*Free Code Camp*

**[Link](#)**

November 2021

### **Javascript Algorithms & Data Structures**

*Free Code Camp*

**[Link](#)**

January 2022

### **Front End Development Libraries**

*Free Code Camp*

**[Link](#)**

February 2022
