EXPERIENCE

United Nations ESCWA Technology Center

Remote

Web Developer (intern)

November 2020 - February 2021

- In a long-term effort to support youths and small start-ups in the middle eastern regions, the UN ESCWA Technology Center had the development team contribute to some web applications which would serve to provide free tools to youths and a community for small enterprises to share and request resources.
- Working in a team with another developer, My main role was to convert designs, from the UI team into working responsive web applications using HTML, CSS, and Drupal. After months of coding responsive websites, I got proficient at creating responsive designs and collaborating with the UI/UX team.
- I also debugged code written by previous interns and updated design content.
- Making Git pull requests to the main project repository via pantheon.io
- Quickly learned d3 library on-demand to assist the marketing team to visualize presentation data create.
- Meetings with technical and non-technical teams to discuss the web application status, project deadlines, and iterations.
- Learned to pay keen attention to my code structure and make each block reusable. Completed my tasks timely, with diligence, and enjoyed every part of the work.

University of Buea

Buea, Cameroon

Android Developer(student)

May 2020 - July 2020

- Worked with my class assigned team to build an application that monitors and tracks the distribution of amenities to the population during the COVID-19 pandemic
- I designed and implemented the user registration and user update front end and Wrote the code to make this process functional with Java using Android Studio. [\[link\]](#)
